Experience

Joovlin Limited/ Frontend Engineer

MAY 2021 - PRESENT, LAGOS, NIGERIA

- Built an online store powered by Next Js typescript, redux state management, Tailwind CSS, and graphql for API calls.
- Collaborated to build an e-commerce chat application with flutter that uses BloC for state management.
- Worked with a team of developers in a fintech startup in building a web payment checkout portal.
- Consumed authorization, payment, password-reset APIs by an Axios client and state management was properly executed with Vuex.
- Developed landing pages and dashboards using Nuxt Js and Tailwind CSS.

Full Power Webs/ Frontend Engineer

JUNE 2020 - APRIL 2021, INDIA (REMOTE)

- Collaborated with in-house web designers to transform sleek and innovative UI designs into web pages.
- Conceived and built optimized landing pages in HTML and CSS.

University Of Lagos/ Electrical and Electronics Engineering, BSc.
AUGUST 2016 - JUNE 2023, LAGOS, NIGERIA.

Golden Touch College/ SSCE
JULY 2010 - JULY 2016, LAGOS, NIGERIA.

Projects

Joovlin Online Store

A Next Js, Tailwind CSS e-commerce website where customers can view products, enter delivery details and place orders.

Joovlin Mobile App Link

An app link or URL that directly opens the Joovlin app on a user's device, bypassing the need to navigate through a web browser. And also an SPA website in case the user does not have the app installed.

Joovlin Admin Dashboard

A react based dashboard where an admin can manage roles and permissions and view the details of all users on the platform.

Joovlin Online Checkout

The online checkout is an online payment portal made with Nuxt JS and integrated with Flutterwave where users can make payments using their preferred payment method (card, wallet or bank transfer).

Store Management Web App

A Nuxt PWA where a store owner can upload items and manage their store.

MyQtab Academy

MyQtab is a joint ecosystem for students and content-creators. Students can register for online learning and content-creators can create courses and earn.

Joovlin Dashboard

A dashboard where a registered business owner can manage their account, invite team members and see all of their customers, balances and transactions enabled with filters and pagination.

Joovlin Website

A responsive website built with Nuxt js and Tailwind CSS.

Afriglobal Insurance Website

A responsive multi-page website built with Next js and bootstrap. Animations were implemented with CSS keyframes.

Komputerzone Phone Repair Web Application

Komputezone is a web app that connects a user to the most suitable phone repairer registered on the platform after the user must have selected his phone type and repair type.

Joovlin Mobile App (Flutter)

A flutter based application with a chat enabled interface where product resellers and suppliers can upload items, engage customers and complete orders.

Objectives

To obtain a challenging software engineering role where my problem solving experience will have more valuable application in building something big.
